V. INFORMATION/STATUS REPORTS

A. Program Updates

1. Community Services Department Presentation – Perry Brents **a. Capital Improvement Projects (CIP)**

Commissioner Britt called upon Perry Brents to begin the presentation, Mr. Brents reported as follows:

Mr. Brents approached the podium and began the Capital Improvements Project presentation for the Community Services Department. The Community Services Department coordinates the park system of nearly one hundred and twenty-six acres of open space including nine parks which were detailed in the presentation along with four public facilities; Rialto Community Center, Fitness & Aquatic Center, Rialto Senior Center and the Sandra Courtney Playhouse. Mr. Brents addressed the recent assessment of City parks that was conducted in March explaining the conditions of the parks and anticipated repair costs. One million one hundred thirty-five thousand six-hundred and fifty dollars in repairs were needed between all of the parks. City Council approved 1.3 million dollars for Frisbee Park, Anderson, Birdsall and the Community Center will have rehabs done. We are trying to rehab the 300 wing at Johnson Community Center and the concession stands at Frisbee Park. Designers for the concession stands at Frisbee Park will be discussed at the June 28th City Council meeting. The first priority at the Johnson Center will be a fence followed by improvements within the 300 wing. In 2017 the City Council approved rehabilitative work to meet ADA guidelines such as no signs on the door, not being able to turn a wheelchair 360 degrees and the curb being too high. An inventory check was conducted by Mr. Brents personally to make note of all the issues that need to be addressed. Commissioner Trujillo asked how these needs were identified at Ferguson Park being that is one of the City's newer parks? Mr. Brents replied stating that the ADA requirements have been changed since the park was built, and additional maintenance needs arise overtime. Commissioner Sparks asked if the paths of travel were approved when the park was originally designed, Mr. Brents responded yes, but, again additional safety and ADA requirements are now being required. DeVost commented saying that the safety issues should be a priority and addressed immediately, Mr. Brents agreed and added that these issues must be brought up to current building code standards to be compliant. Commissioner Britt mentioned his concerns about the cost of repairs using unionized workers to fix the repairs. Mr. Brents stated that funds have been identified through CDBG and other special City funding sources and it may not be enough, but the priorities will be addressed first. In conclusion, Mr. Brents stated that a schedule and scope of work should be available to review at the next meeting.

2. Project Updates

Johnson Center Fencing Project – Perry Brents

Commissioner Britt acknowledged Mr. Brent's previous commentary regarding the Johnson Center Fencing Project within the CIP presentation.

Park Design Frisbie/Cactus & Randal Property – Perry Brents

Mr. Brents continued his statements and reported on the Park Design Frisbie/Cactus & Randall property as follows:

Although the park design was addressed within the presentation, Commissioner DeVost requested more detail regarding the selected contractor that will be designing the project. Mr. Brents stated that based on past experiences, Council was not happy with the previous services and Council has decided to proceed with the contractor who consulted for Bud Bender Park.
