(1) For hotels with restaurants, the DIF for the hotel and the restaurant are calculated separately then added together.							
(2) For industry and heavy manufacturing, the DIF for an equivalent warehouse is calculated, and added to the DIF calculated for non-domestic sewer flow according to the formula: DIF = flow (gpd) * \$5.02 + BOD (lb/day) * \$1,007.38 + TSS (lb/day) * \$1,128.90							
							Fee Adjustment to 12/31/2018
