# BIGS

## IGNITE POTENTIAL THROUGH MENTORING

College Bigs opens doors to new opportunities for high school students and enriches the lives of college mentors. Through 1-to-1 mentoring, high school students can increase social capital, strengthen college and career readiness, and find their voices as community advocates. The relationships they build with college mentors empower them to overcome educational and economic barriers on their path to success.

### COLLEGE BIGS CAN:

Create a community of mentors and like-minded philanthropists on your campus

Allow educators to gain direct access to future students at your university or college

Launch emerging leaders onto a pathway towards post-secondary education

Earn direct-service experience working with youth once a month while completing volunteer requirements
