

## Through 1-to-1 mentoring, Big Brothers Big Sisters is cultivating the next generation of leaders, changemakers and advocates.

We combine authentic mentoring relationships with social emotional learning to unlock new pathways for high school students. In this innovative site-based mentoring program, students develop their strengths as young leaders, discover future career opportunities and become advocates for social change in their communities. Three distinct tracks are offered for youth to ignite their potential through mentoring:\*

### HIGH SCHOOL BIGS

As role models to elementary school youth, high school students learn to build meaningful relationships while finding their own voices as community advocates and philanthropists.

### WORKPLACE MENTORING

Focusing on college and career readiness, Workplace Mentoring offer students a jump start in their professional development with exposure to major corporations and 1:1 time with accomplished mentors.

### COLLEGE BIGS

College mentors give our high school youth an inside look at post-grad experiences while participating in tailored social emotional learning sessions that encourage philanthropy, advocacy and relationship building.

As a leading youth mentoring organization, Big Brothers Big Sisters is uniquely poised to empower, engage and connect this generation of underserved high school students. With this program, we offer a proactive solution to prevent youth disconnection. Driving post-secondary success and teaching essential life skills will ultimately launch these future leaders into college, career and beyond.
