

Holiday Lighting Safety

The holidays are a great time of the year! Enjoy your holidays with decorative lights, but be safe and mindful to bring them down after the holiday. There can be unsafe conditions associated to holiday lights in regards to power sources, exposure to the elements, and overloading the circuit.

Remember: Take down holiday lighting after the holiday. Lighting can only be up for no more than 90 days!

All holiday decorative lighting (and similar lighting installations) are permitted for a period not to exceed 90 days.

California Electrical Code 590.3B & Rialto Municipal Code 18.72.010B6

You should always use approved type UL listed or labeled wiring and equipment.

California Electrical Code 110.2

Use all listed or labeled wiring and equipment as instructed.

California Electrical Code 110.3B

Code requires that ALL electrical equipment and wiring to be properly installed and maintained in a safe and approved manner.

International Property Maintenance Code 605.1
