PUBLIC NOTICE – PROJECT FACT SHEET

DATE: July 19, 2023

PROJECT LOCATION: Randall Avenue at Rialto Channel in the City of Rialto

PROJECT DESCRIPTION: The project includes removing the existing corrugated metal pipes on Randall Avenue at Rialto Channel and replacing it with a new larger concrete box culvert. Other improvements include constructing a small segment of channel section, channel grading, and reconstructing approximately 100 feet of roadway to ultimate width to improve traffic flow.

CLOSURE INFORMATION: Due to the large amount of roadway excavation required to construct the project, and in the interest of public safety, San Bernardino County Flood Control District with City of Rialto concurrence, will close Randall Avenue, which is a City maintained roadway, from Cactus Avenue to Lilac Avenue for the duration of the project. Access to residents and emergency vehicles will be maintained on paved streets as shown on the attached detour plan map.

We regret any inconvenience this work may cause you and we encourage you to allow additional time in your commute schedule to use the detour. We look forward to the timely completion of this project that will enhance the quality of life in our local communities by constructing a new larger box culvert to reduce the potential for roadway flooding during storm events, and to provide flood protection for the existing structures and residences within the project area by improving drainage.

ESTIMATED CONSTRUCTION DATE: Fall 2023

COUNTYWIDE VISION: This project was approved by our Board of Supervisors upon the passing of the County's 2023-2024 budget. This project is in line with the Countywide Vision of a sustainable system of public safety. In its dedication to the Vision, the Department is continuing its ongoing efforts of constructing improvements on the San Bernardino County Flood Control District maintained drainage facilities.
